

CLEANING CHEMICALS THAT WORK

Midwest Cleaning Solutions manufactures a full line of industrial chemical cleaners, including soaps, detergents, waxes, and foams for truck washes, car washes, oil-field equipment, fleets, buses, and mobile washes.

CAR WASH PRODUCT LINE

High pH Presoaks

| | |
|---|--|
| MC-560 RTU Alkaline Detergent Concentrate | MC-560 is a heavy duty alkaline car wash detergent. It can be used as a self serve prep detergent, a stand alone detergent, or as a high pH second step in touchless automatic car wash systems. MC-560 penetrates and removes road film, bugs, and greasy soils. It rinses easily and leaves the surfaces clean and shiny. It leaves the glass perfectly clean and even removes the stubborn dirty eyebrows on the windshield. |
| REFLEX-CW Alkaline Detergent (2-part kit) | REFLEX-CW is a heavy duty alkaline car wash detergent. It can be used as a self serve prep detergent, a stand alone detergent or as a high pH second step in touchless automatic car wash systems. REFLEX-CW penetrates and removes road film, bugs, and greasy soils. It rinses easily and leaves the surfaces clean and shiny. It leaves the glass perfectly clean and even removes the stubborn dirty eyebrows on the windshield. |
| DIAMOND-CUTTER All Purpose Alkaline Powdered Detergent | Diamond-Cutter is an economical detergent formulated with alkaline builders, water softening agents, rinse agents, and biodegradable surfactants. It is an excellent truck wash and car wash high pH presoak detergent. Diamond-Cutter is a granulated compound with a mild odor. |

Low pH Presoaks

| | |
|---|---|
| MC-77 Low pH Car Wash Detergent | MC-77 is a concentrated high foaming low pH detergent developed for all automatic car wash applications. It is formulated as the first step in a two step cleaning process. MC-77 working with high PH detergents such as MC- 560 or Reflex-CW, will leave the car finish cleaner and help eliminate the windshield eyebrow appearance. MC-77 is a light blue liquid. |
|---|---|

Foaming/Lubricating Detergents

| | |
|---|---|
| VANILLA SHAKE High Pressure Concentrate | Vanilla Shake a non-phosphate neutral pH high pressure detergent concentrate. It combines high suds, detergency and fragrance appeal for superior and economical cleaning. Vanilla Shake is a neutral pH detergent formulated with a proprietary blend of surfactants to gently clean vehicles. It is an excellent choice for self serve high pressure washing applications. Vanilla Shake is a tan liquid with a unique vanilla fragrance. |
| MC-30 FB High Foaming Liquid Concentrate | MC-30 FB is a neutral pH detergent formulated with a proprietary blend of high performance surfactants to gently clean vehicles. MC-30 FB is an excellent choice for self serve foam brush application and brush systems. MC-30 FB is a pink liquid with a mild sweet fragrance. |
| MC-33 Lubricating Foam | MC-33 is a neutral pH detergent formulated with a proprietary blend of surfactants to gently clean vehicles while providing a high amount of lubricity to soft touch car wash systems. MC-33 is also an excellent choice for self serve foam brush application and brush systems. |
| TRIPLE-7 Low pH Lubricating Foam | Triple "7" is a low pH detergent formulated to clean with added lubricity in friction wash systems. Triple "7" aids in the removal of stubborn road film and oxidation from vehicle surfaces. Triple "7" can also be used in a low pH foam brush application. |

Triple Foams

| | |
|---|--|
| MC-420 Triple Foam Clear Coat Protectant | MC-420 is a super foaming polymer fortified formula providing clear coat protection. It is scented and available in 3 bright colors red, blue, and yellow. |
| MC-425 Triple Foam Clear Conditioner | MC-425 is a super foaming formula providing vehicle surface conditioning, and easy rinsing. It is sweetly scented and available in three vibrant colors: red, blue, and yellow, to enhance the overall customer car wash experience. |

Drying Agents/Clear Coat Protectants

| | |
|--|---|
| MC-405 Spray-On Rinse Agent | MC-405 is a spray-on rinse agent providing excellent sheeting action. It is formulated with petroleum distillates and emulsifiers. MC-405 is a pink liquid with a pleasant cherry scent. |
| MC-406 Lemon Fresh Drying Agent | MC-406 with lemon fragrance is a concentrated drying agent for all car washes providing excellent sheeting action. It is formulated with petroleum distillates and emulsifiers to reduce drying time. |
| MC-407 Clear Coat Protectant | MC-407 is a concentrated protective vehicle sealant. This scientific formula bonds to the vehicle and delivers a fast breaking action that leaves a brilliant shine. Provides excellent gloss and protection, and can be used in all car wash systems. |
| MC-RX Vehicle Surface Protectant | MC-RX is a new spray polymer compound agent providing excellent glass and paint protection. It is formulated with latest polymer technology to provide shine, protect surfaces and provide long lasting rain and snow repellency. It is a superior drying agent as it forms large water droplets for easy spot free blow off. MC-RX is a yellow liquid with a variety of pleasant scents. |
